Genesis

X-Terra, an exoplanet discovered 1000 years ago by the XR-Pioneer probe that was intended for space exploration. It has been built by the AlphaTech Corporation, which was the leading company present on Earth before the big flare. During these times they did act as a lifeline and gave a new hope to the humanity.

Thanks to the help of the probe, a planet extremely similar to the Earth has been discovered and several expeditions have been concluded before starting the colonization.

The basic resources that the planet offered were unlimited and the planetary scanner had also discovered that the composition of the rocks were containing a high percentage of precious minerals, leading the company to opt for X-Terra rather than other planets.

Genesis

Several humans left the Earth to populate their new home and to ensure a continuation of the humankind, while a large part of them decided to stay due to various circumstances: attachments, lack of self-esteem, disbelief, or fear of the unknown.
Once established on the new planet, everything proceeded perfectly with the help of the XR-Droids - the support automatons intended for the construction of infrastructures and the protection of humans from unknown dangers.
Their help was of primary importance to the colonists, who were able to rebuild and proceed with their lives as on Earth.

This is the XR-Pioneer probe built in the year 2404 by AlphaTech Corporation

Vision

«The XR-Droids project aims to merge the digital NFT with the physical world, with the addition of an engaging experience through a NFT-based videogame based on XRPL»

Introduction

Welcome to the future of gaming with XR-Droids! The survival mode is just a glimpse of what's to come in the larger XR-Droids universe. Designed in 2D with the Unity C# framework, this game mode sets the stage for a comprehensive gaming experience, exclusively available to XR-Droids NFT holders.

The XR-Droids NFTs boast unique in-game characteristics tied to their weapon and equipment, with rarity playing a pivotal role. Brace yourself for a play-to-earn adventure, where XR-Droids tokens takes shape in the survival mode.

Prepare for an immersive journey driven by a reactive and robust backend and captivating animations at frontend levels. The XR-Droid's equipment will dictate the skills at your disposal, adding depth to the gameplay.

Access the game through your XR-Droids, choose your NFT character, and dive into the survival mode. Enemies will lurk from all directions, and your survival skills will determine your earnings in XR-Droids coins through enemy drops. With time, the challenges intensify, pushing your limits. Upon losing a life, you will have to restart the game but some parameters will be saved for ranking calculation, like score and time.

The game will introduce an intriguing balance between enemy difficulty and coin drops. As foes become tougher, the rewards increase, discouraging players from exploiting the system for easy gains.

Climbing the ranks comes with perks, as top players will receive NFT or Token prizes. XR-Droids tokens earned in survival mode will carry value into multiplayer, where will be possible to trade for character upgrades. The system will encourage strategic progression, ensuring a dynamic and rewarding experience for players.
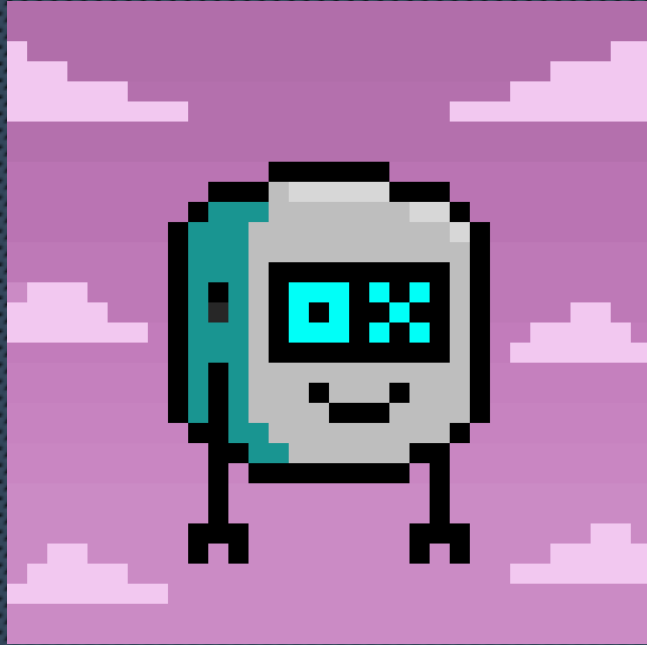

Context | XR-Droids Game

The 2D XR-Droids Survival mini-game, which can be accessed through a browser, will offer challenges and rewards. This combination of elements will ensure a captivating and dynamic gaming experience.

This single player survival adventure in a 2D perspective will be difficult but at the same time with will offer rewards for the efforts. The prizes in question will feature XRDROID coins (XRPL). Access will only be allowed to XR-Droids holders.

Contextually, the players will start from an easy level and as they progresses with the score, the difficulty will also increase. Enemies will become more and more aggressive and dropped items will be increasingly rare. It will be possible to collect items such as coins, vitality refills, special attacks, movement speed and fire rate boosters, bullet upgrades, and additional temporary weapons. The addition of bosses will be considered.

NFTs | XR-Droids

The XR-Droids are the automatons responsible for terraforming the X-Terra planet and have been brought to life by the X-Terra Citizens, granting a new hope of survival through their support.

- They are the main actors that will be used to access the browser based 2D survival game.

NFTs | XR-Droids Phygital Figures

With the term phygital, XR-Droids project is bringing something new into the real world with NFTs, making real life objects more unique 🏅 and valuable 💎

The entire collection, currently **registered on the XRPL**, will be associated with the future collection of 3D models, both digital and physical.

The models will be made available via the **merchandising store** that will be developed in the future. They will be obtainable only through the possession of XR-Droids NFTs and for each of them owned, only 1 replicated model will be made available.
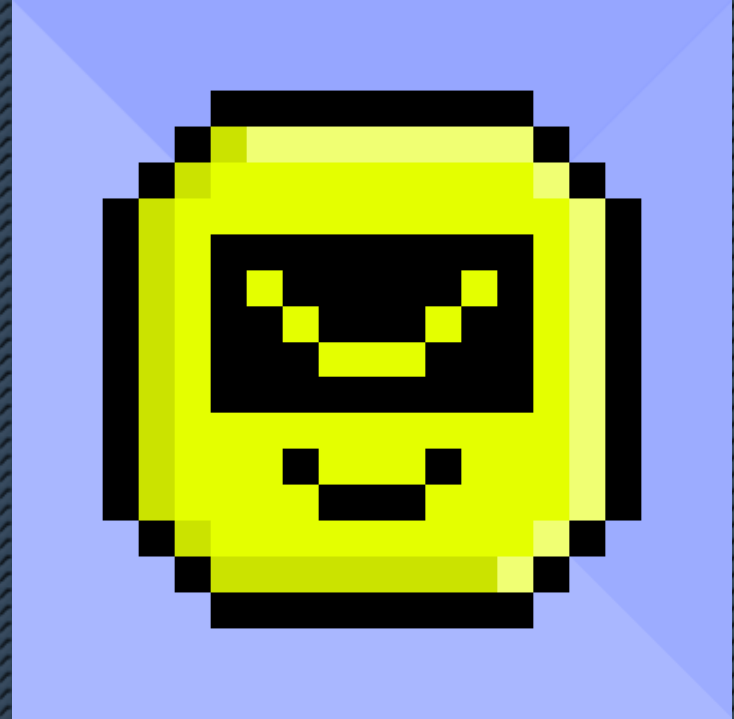

Choose your favorite XR-Droid carefully! 👾

Token

The XRDROID token is a utility token based on XRPL and will be integrated inside the XR-Droids game as a spendable currency and as a reward for players.

> Name: XRDROID

> CA: TBA

> Total Supply: 10m
>> Public Supply: 7m (70%)
>> Airdrop Supply: 1m (10%)
>> Gamedrop Supply: 1m (10%)
>> Dev Allocation: 1m (10%)

Timeline

Q1 2023
XR-Droids inception
Each NFT has been brought to life through a custom random combination process, resulting in a collection of one-of-a-kind characters.

Q2 2023
NFT metadata scanner tool build & deployment
The NFT Metadata Scanner has been a part of the development process, intended for the detection and improvement of NFT collections before the final deployment.

XR-Droids collection upgrade
The evolution of the XR-Droids continued its path with an upgrade into captivating GIF animations.

Q3 2023
XR-Droids NFT launchpad
August 2023, the exclusive collection of 10.000 XR-Droids NFTs has finally landed on the OnXRP launchpad.

Q4 2023
Analysis phase
The main objectives were outlined during this first iteration of the project, including:

Selection of development platform for the game and assets | Target users, end-devices | Final use case deployment | Strategy planning | Marketing planning | Organization planning | Risk assessment

Q1 2024
Development phase – P1 XR-Droids GAME CORE

Timeline

Q2-Q3 2024
Development phase - XR-Droids Game

Q4 2024
Launch the XRDROID token on Dex
7.000.000 XRDROID will be put on dex as initial supply.

Airdrop event of XRDROID Token for NFT holders
1.000.000 XRDROID will be reserved and airdropped equally to each NFT held after the snapshot.

Workgroup expansion
To dilute the workload appropriately and achieve the objectives, additional professionals will be required, such as Level Designer, Graphic Designer, Game Programmer, and UX Designer.

Q1 2025
Release of XR-Droids – Survival game

Q2+ 2025
Prototyping of the XR-Droids 3D figures
All the traits of the XR-Droids NFT collection will be turned into 3D assets and ready to be printed.

Release of the XR-Droids physical figures + Merch store
Owners of XR-Droids NFT will have the option to redeem phygital figures through the merchant store.
All the traits of the XR-Droids NFT collection will be turned into 3D assets and ready to be printed.

Launch of X-Terra Citizens NFT on XRPL

💻 🛠️ 📊 🎨 🎮

Hi there! I'm here to share some cool stuff based on my skills and passions. Learning economy since 2005, IT dev/designer since 2013, crypto follower since 2014, and gamer since the 90's. After the IT studies, I worked with big data in a supercomputing center but later decided to become autonomous by building years of experiences in web and game development. In the other side, I'm continuosly involved in learning the concepts and usages of the blockchain ecosystem.
